

WORKERS' COMPENSATION COMMITTEE
2017 ANNUAL REPORT

The business of the Workers' Compensation Committee has been conducted exclusively by telephone this year.

We read about fraud in the workers' compensation field that involves insurance companies and employers. Fraud from these institutions is rampant while firefighters continue to get the shaft. The CSFA Workers' Compensation Recommended Attorneys are working hard assisting firefighters overcome this fraud.

This Committee has been preaching, for years, that you must **PRE-DISIGNATE** your physician, or a treating facility. There is a form on the Workers' Compensation CSFA website that you can download and have your physician sign, and return to your department.

Workers' Compensation legislation needs to be fought for aggressively. If we don't fight for our rights, our injured firefighters, and their families, will pay for this big time.

My thanks to our CSFA Recommended Workers' Compensation attorneys for their dedication to firefighters; fighting for our workers' compensation benefits; and making themselves available, at no cost, to CSFA.

Stay Safe

George Stillman, Chair
Workers' Compensation Committee
